Persia sailed do not belie public expectation in this country. The Austrians, admitting all the disastrons consequences of their successive defeats at Montebello, Palestro, Varese, Como Verona and Legunno. They have abandoned Pavia, Piacenza, Bergamo and Lodi, destroythey go. They have given up Ancona on the Advance, and are calling in their scattered garrisons from the States of the Church, surrendering possession of Egrara, even, where they were supposed to be so strong. Military men familiar with the ground have supposed that they would make a stand on the banks of the Adda; but the remembrance of Lodi was too much for them, and they passed the stream without firing a gun! He would be a prophet who could toll how soon they can again be persuanted to take the field in face of the pushed and victorious Allies; and he would be more than a prophet who could say how soon those Allies will be able to surmount the enormous earth-works and piles of heavy masonry behind which the "invading army" are ere this sungly entrenched. We shall see. In the meantime the world will block with astonishment at the astonuding surcess of the Allied arms—success which in the minds of all Frenchmen bring back the days of 1798 and 1890, when Napoleon the Great swept the Austrians off that same Italian ground.

The Times, as we read it, has made another one of its leaps, and new stands arthe Italian cause. Its advice to Austria is wholesome; but the obstinacy of those to

The feature of the news is, however, the Flora continued to brush, and closing gradius was lapped on her wheel at the quarter, which are to the half mile pole, when, as a reached the lower turn, Princess again of away from her, and at the three-quarters we length in advance, in spite of a renewed energetic attempt of Fl. ra. now to obtain mastery. If the writer is honest in his professions, and will content himsel with the establishing of Italian Nationality, the whole civilized world will ring with his praise. But those who remember the pledges which he made to the French people, and the Democracy was his role-pledges and oaths which he has deliberately violated—will read his promises to the Italians with well-founded distrust. But let us wait the culmination of events, and then judge.

A NEW LIGHT IN IOWA.

If our Des Moines correspondent is not mis-taken in his synopsis of the new Democratic platform of Iowa, printed in another column, the Pro-Slavery party of that State have made the discovery that the Dred Scott decision is directly at war with Popular Sovereignty, and that the two cannot exist together that the Supreme Court has no right to lay down political rules for the country. This is clearly a repudiation of the Dred Scott dogme, and a general snubbing of Douglas, Buchanan, Taney and all who profess to endorse and be

A WEATHER PHOPHEOV.

We publish classwhere the claim of Mr. F. L. Capen to a discovery in Meteorology, the most abstruss of the physical sciences, which will certainly revolutionize the commercial and agricultural interests of the country, and indeed of the world, if Mr. Capen can make good what he promises. We confess to sharing in the skepticism which will be avoided among ninety-sine-hundredths of the readers of his communication. At the same time we shall be in the highest degree grafified to find his system of weather predictions even approximately correct. Mr. Capen acompanies his letter, which was written and handed to us on Saturday last, with predictions of the weather for three days, somewhat minute, and with a statement in general terms as to the whole week. Two days more passed, substantially confirming his validinations, but it may be held that this is the result of accident rather than is able tennenced as deletatorial by Judge Douglas's letter, which you published that this is the result of accident rather than feel and the statement in general terms as to the whole week. ous times made weather calculations for dif-ferent parts of the country, of remarkable accuracy, on a novel system of his own devising, Mr. Basanett's system was published some years ago in a book, which was severely frowned upon by the managers of the American Association for the Advancement of Science, though no satisfactory reason was

given for their decision upon its merits.

If there is any groundwork of truth at the bottom of the presumed discoveries of either of these gentlemen, the world will surely award them places among its benefactors whenever

the proof is presented.

No newspaper reader now-a-days can afford to be without a reasonably good map of the seat of war. We know not what one to recommend; but if the map-makers will take our advice and republish in cheap form some standard European map, say that which accompanies "Murray" Hand-book of Northern Italy."—They would do the public an acceptable service, and put money in their purses thereby. Half the interest in passing events is lost by want of a little correct Geographical knowledge.

A large number of people are finding their way to the spot, in anticipation of the event, and there will, doubless, be a great crowd present. Our railroads are stready carrying them that way, even from as great a distance as Chicago. Is appears that he came out to Provise, and worked two and a half days, and on Monday morning he got his bundle and was leaving, when his employer and Welch salled to him testop—his exit being so sudden, they thought they would ask him the cause of his leaving, but he became frightened and rus, they thought he had stoken something by his manner, and they chased him, they run him into a tavers. Here he stayed some time, but when about leaving, he again met his pursuers and in the discussion he stabbed. Welch in the side, with this file, which is six inches long and has three sides to it. He was then bound and brought in. His name is Stephen Mackingo, is an irishman, he says he came from Paw Pays, Michigan, and that he did this in self-defence, they would have killed him, that 100 men have been chasing him to kill him for two years past, they have followed him shrough the country, and he was confined at Paw Paw on ent so far as to give his boarder "a critter," as a expressed it, to ride around with. The doc-or said he could do no good without medicine, nd so the old gentleman kindly passed word for im at the drug store, where Dr. Ames obtained ome \$100 worth of medicines on account. In a days the old gentleman perceived that on of the doctors' aims was to marry his eldest daughter. Prominent Democrats from all parts of the tate are here, and watch the proceedings with a interest that it is impossible for them to feel their own Convention. Among the promient Republicans present I notice Hon. S. R. urtis, Hon. Jas. Harlan, Hon. Wm. Yendever. on. Jas. Thorington, Hon. S. J. Kirkwood, ov. Lowe, Hon. T. Davis, Judge Rankin, Judge Haon, and a host of others. The amendation

outrage, was deemed a guarantee of perpetral secrety among the actors themselves. What may have been Gorman's reasons for turning Skate's evidence against his "pala" we do not know to a certainty, but it is supposed that, having been cheated out of his ahare of the hooty resulting from their joint crime against the people, he is now determined to pull the house down about the ears of the whole gang, even at the risk of breaking his own bones. RATTPICATION MERTING AT DES MOINES, [Correspondence of the Press and Tribuna.]

Dam Monins, June 24, 1202.

Last night a large and enthusinastic meeting of the Republicans was held at Sherman's Hall. Jun. A. Kasson, Esq., Chairman of the old and new Central Committee, presided, and Senator-Harlan delivered the principal speech of the evening. It was the best speech I have over heard in Des Moines. Prench Government. The position of the sent Democratic Administration is there-, a voluntary surrender to Prance of what had formally abundoned. Such a surren-would be pusillanimous in the face of a internation on the part of a foreign govern-tent for E. edich. evening. It was the best speech I have ever heard in Des Moines. The financial condition of the nation be detail-ed from the reports of the officials, and showed the profitigacy of the Administration out of their own mouths. He proved that not James Bu-chanan but the Democratic Party are rusponsi-ble for the acts of this Administration. For more than an hour in scattled the Ad-

racine hairoat. The are in Javorof an economical administration of the general government, and opposed to the slave trade. Beside this, there is a batch of resolutions on State policy, condemning the prohibitory injuor law the free school law, and opposed to all "woo!" Upon comparison of the resolutions, I find both Douglas and Buchanan snubbed, and nothing but the abundoned doctrine of Squatter Sovereignty and the Cube burglary approved. To retain the atherence of the Irish, they resolved to abolish all flavor laws.

The Convention then proceeded to adopt the resolutions as they were read, and they went down with cheers and choking.

After that, a motion was made by Gillaspie,

gentleman hoped they would not his Dorr, as it was disrespectful.

Dorr was satisfied with the indorsement of

It was disrespectful.

Dorr was satisfied with the indorsement of Dodge by Gilliapsie, and ascended his nomination. So Dodge was nominated.

Babbitt was nominated on the first ballot for Lieut. Governor, and Mason and Wilson were nominated judges of the Supreme Court by seclamation, and Cole was nominated for the same office on the irst ballet, distancing his competitors, "Jarius," the iron of Marion, and Baker, the great flows tax payer.

A resolution was offered, claiming an executive appointment by President Huchanan of some Democrate of Iowa to some high position at Washington, which was tabled, and, by motion, was to be left out of the proceedings, lest 01d Banc should take unbrage at the independence of the flows Despotracy. But Jenny and better appoint a man, for the Squattar Sorreigns of Iowa are rather "down on him," and his registers, and newspaper men, and postmasters, had a hard time to-day in keeping the Democracy from profuning the Administration with the touch of unglored hands.

To-night the unterrified hold a grand powwer at Shermm Hall.

The whole business of the Convention was done in an hour after the platform was in.

Nominations are easily made where no one expects the nominees to be elected. I should mention that the Convention gave Tomlinson, one of the Democratic editors, leave to how

From the St. Paul Minnscotian flat.

Gov. Gorman testifies to that which we knew and charged long ago. It is, as he intimates, an undoubted fact, that the first forgeries from "Cass, Todd and Pembins" did not afford suincent votes to elect Stibley! But when the returns from Lake Superior were received and found so unexpectedly favorable to Ramsey, Rice was made responsible for the result up there by the Stibley branch of the Moocassinites. A leading red faced friend of Rice, was thereupon heard to say, "well, this Lake Superior return has kicked up such a fuss that to save Hearry for Sensitor we'll now have to go to work and fix it up differently." Then it was, that the famous "Sunday Cancua" of the Democratic leaders, principally if not wholly the chief Rice men, was held at the American House. There it was, that Secretary Chase stated the footing up of the returns as they stood in his office, and that "something must be done or Ramsey was elected!"

Then it was, that his brother, John X, Chase, was sent with Iran new poil books from the Pioneer office, into the upper country, to have the pecessary returns forged at Swan kiver and Crow Wing; which was all duly done according to the Sunday causus programme, and the term arrangement," through a barefaced dispensed of their asits by McLassard. party, but a large portion of the Democratic party of this county to be highly creditable, not only to this country, but to the State of Iowa-He will, beyond dispute, poll a heavy Demo-cratic vote in this as well as in many other coun-ties. He is the representative Republican of this State.

thes. He is the representative Republican of this State.

Mr. Rusch, the nominee for Lieut, Governor, is a citizen of Davenport, a German by birth, and a gentleman of excellent attainments and unimpeschable integrity. He also is a State Senator, from the Davenport Senatorial District. He has served the people of the State in this em'sent and responsible capacity, and thus gained the strong hold he has upon their confidence. The office of Lieut, Governor of this State is a responsible required. State is a responsible position. He is not only President of the Senate, but also President of the Board of Education. For this position Mr. Rusch is well qualified, and so will the people of Iown say at the polls.
Of the Judges of the Supreme Court we can but express one sentiment; they are excellent men, and emmently qualified for the position. Gov. Lowe is the present Executive of the State,

Gor. Lowe is the present Executive of the State, an able lawyer, an honest man, and a true Republican, all of which the people of Jowa know him to be. Judge Stockton is one of the present Judges, and the fact of his re-nomination is ample proof of his superior qualifications for the position. Mr. Baldwin is a citizen of Council Huffa, and has the reconstation of hings, and the position. Mr. Baldwin is a critzen of Coun-cil Bluffs, and has the reputation of being a good lawyer, and is well qualified for the position of Judge.

The entire ticket is a good one, an acceptable

one to the Republicans of the State, and one which will command a majority of fifteen thou-sand of the votes of the State. C. W. H.

Guenc, June 18, 1859.

Before stepping on board the Indian I mass thank you for your two letters which have reached me here. I observe your expression of regret that I had not attended one public meeting before I left the United States. But on redication I think you will agree that I exercised a vise discretion, resisting every termon. cised a wise discretion in resisting every temps ation to bring me into the field of politics, for to talk in public in your country would be in my case, necessarily to talk politics. I have long entertained a strong opinion that the less linguald and America canyase such other's do-mestic politics, and the more they discuss their stability of their institutions. Still I cannot but lument the want of a public opportunity before leaving this continent of expressing my gratitude for the numberless courtesies and the touching sets of kindhess which I have experienced in my travels in the United States. Everywhere I have found myself among friends, and the further I travelled into the interior the more did the hospitality and kindhess of the people make me fancy myself at home. I shall ever remember this visit with feelings of pleasure and gratifude, and again thank you for the friendly reception I met with at West Roxbury.

South Bend, leiting thirty passengers outright and maining, more or less horribly, some firty or fifty mrs. The news turneled with autonomials and the second state of the sec or fifty m ra. The news traveled with asten-ishing rapidity through the business streets, receiving additions to the list of dead and dy-ing at every corner, and carrying terror to scores of families who had relatives on the shattered train, or who, imperfectly under-standing the news, had located the some of the disaster on other roads where their driends were supposed to be. Before the publication of the casualty had fixed the number of the dead at aixty and the wounded as many more. Unfortunately the extent of the calculity had not been overestimated by rumor. The de-tails which we publish elsewhere tell of a des-truction of human life unparalled, so far as our I color.

The Genenande-accident on the Pacific R. R., of Missouri, is the only one which can be compared with it in the catalogue of horrible doings, and this, if we are not mis-taken, did not embrace so large a list of dead and wounded as the one which we are now called upon to chronicle. Mishawaka precipitating the locemotive into the chasm, and hurling the baggage and ex-press cars, two second class and three first they were shivered into fragments, surying the passengers in a conglomeration of muddrift wood, splinters and kenken wheels—over which a sheet of water, which had accumulated against the embankment, instantly sweet caractering off every thing which would float and drowning the passengers who had been spared by concussion; all this in interest darkness. These would seem to be elements smillent to account for the sixty lives lost, or said to be lost, in the fatal ravins. It is impossible as yet to locate the blane of the tragedy. All accounts agree that the embankment was undermined by a very sudden and violent rais. run, or an ankie-deep water course, to a pow-erful torrent carrying down rulls, logs, leaves, brush and mud, which formed a dam across the mouth of the culvert, leaving the water to accumulate against the earth work of the road. Ti is became astronaud in work of the road.

To is became asturated to the consist mortar; and naturally the first conmortar; and naturally the first considerable weight thrown upon the top of it spread the whole mess like a sortar bed.

We shall be able to present a more Incid account, including a description of the topography of the disaster, in our next issue. THE INJUNCTION CASE,
